**FAST, INSTANT DIY COOLING.
NO MESS! NO FUSS!**

HIGH PRESSURE COMPONENTS

DIY Mist cooling - Fast, easy and affordable.

Magique® Mist DryMist kits are designed and manufactured primarily for outdoor use. Each kit consists of all the required components for a fast and easy installation.

DIY installations will be a breeze with the unique 10mm design and can be personalised to fit any requirement.

ReddiKit 12 covers between 20m² and 48m² and is recommended ideally for smaller applications such as patio`s, lapa`s, gazebo`s and decks.

ReddiKit 24 covers between 50m² and 100m² and would be best suited for medium sized applications such as restaurants, marquee tents, tunnels and stables.

ReddiKit 48 covers between 120m² and 200m² and is ideally suited for larger and commercial applications such as events, warehouses, food storage facilities and sports arenas.

If you are looking for an energy efficient, environmentally safe and cost effective solution for dust suppression, humidification, evaporative cooling, pre-cooling and avian control then contact Magique® Mist.
